

Varn Brush Flush

Cleans Dampening and Circulator Systems

Brush Flush is a strong, versatile cleaner that will keep dampening systems clean and contamination-free. Brush Flush can be mixed economically with water and used to clean the dampening circulator system to remove any debris, contamination or biocidal growth. It can also be used to clean brush and spray dampeners to eliminate those same sources of press problems. Brush Flush is not a bleach, and unlike other cleaners, is formulated to be compatible with Varn acid fountain solutions.

Benefits

- Reduces maintenance time
- Increases productivity
- Reduces fountain solution contamination
- Improves fount process control
- Compatible with Varn fountain solutions

Directions

Used a 1-5 ounces per gallon. Use one quart to a five gallon recirculator or one gallon to a twenty gallon recirculator. Let the mixed solution re-circulate for 15 minutes or more in the tanks and pans then flush with water.

Packaging

U.S.A.
4 x 1 Gallons
5 Gallon Pails

CANADA
12 x 1 Liters

Ideal For All
