

Varn Majesta 630

FOUNTAIN SOLUTION

High Speed Web Fountain Solution for Brush and Conventional Systems

Majesta 630 is an acid-gum fountain solution for high-speed web presses. It's most effective on brush and conventional systems. This highly buffered solution will perform in almost any water condition and compensate for alkaline paper feedback. Majesta 630 is developed to combat piling associated with brush dampening. Plus, you'll get excellent cleaning power and fast start ups.

Benefits

- Highly buffered
- Combats piling
- Biodegradable
- No heavy metals
- High speed wetting system
- Fewer press stoppages, longer plate life
- Quicker starts, high-speed production
- Stable print conditions
- Increased productivity, lower costs
- Less waste, higher profits
- Consistent Results

Specifications
